نام ببرید.

A complex maze with a black start point and a red end point. The maze is filled with various colored obstacles: black, red, green, blue, and yellow. The path is a single continuous line that winds through the maze, avoiding all obstacles. The path starts at the black dot and ends at the red dot. The maze is composed of many small, interconnected paths and dead ends. The obstacles are scattered throughout the maze, creating a challenging environment for the path-finding algorithm.
